

The Springfield Group Communities

Individual Site Boundary Line Location

(While one is standing in street facing their home.)

1. Front boundary shall be the street/pavement edge in the front of home.
2. Left side boundary shall be three (3) feet from neighbors slab/skirting and steps.
3. Right side boundary shall be three (3) feet from homes slab/skirting and steps. This area for home maintenance and egress only!
4. Back side boundary is determined by the National Grid power lines overhead. The National Grid poles with the white stripe carry the power lines. In the case where the home site is located on the perimeter of the Community – Back boundary will be to the fence along Community's property line. Homes located on the perimeter with the adjacent fields will have a minimum of twenty (20) feet from home.
